DIFFERENT & BETTER

Founded over 25 years ago, Triad still designs, manufactures, and markets products in a modern facility in Portland, Oregon. We have garnered numerous awards over the years, including being voted First Overall by dealers in the *2007 Inside Track Supplier Loyalty Survey*, winning in: product quality; service; product reliability; technical support; product innovation and eight other key categories.

Triad has adopted both green and lean philosophies, always putting quality first for its employees, dealers, customers and the environment. Our facility is clean and bright and we use no caustic chemicals or solvents. All our speaker finishes are water-based and mixed in-house, exclusively for each order.

Triad speakers are sold primarily through CEDIA dealers – the better, more competent custom companies that are leaders in providing system consultation, design and execution of whole house and home theater sound systems. Contact us today to learn more about our products and to be put in touch with an authorized dealer near you.

SOPHISTICATED SOLUTIONS

The Experts Rely Upon Triad

Nearly all Triad loudspeakers are built to order in America in batch sizes of one, ensuring that every customer gets the most current components, including custom paint or exquisite veneer matching.

All Triad speakers use premium drivers and internal parts and a fully-engineered, braced and sealed enclosure for superior isolation. Solid as a bank vault, our loudspeakers offer the best and most predictable sound.

At Triad, we're also about sound consistency. We make multiple versions of the same loudspeaker for different applications. So, whether an installation calls for an in-ceiling, in-wall, on-wall or in-room model, home sound experts around the world know that our sound will be consistent with each version.

Although we consider every speaker custom made, we can further design pure custom solutions when the application mandates it, even engineering one-of-a-kind speakers. Triad speakers are backed by a limited 10-year warranty against defects.
